Scope 2 - Indirect	209	19%
Scope 3.3 - Fuel and energy related activities	72	7%
Scope 3.6 - Business travel	791	73%
Total	1,083	100%

¹ Tons of carbon dioxide equivalent. This is a standard unit for counting greenhouse gas emissions regardless of whether they are from carbon dioxide or another gas, such as methane.

² Direct GHG emissions from sources owned or controlled by Jefferies, such as fuels combusted in motor vehicles and aircraft, natural gas or other fuels combusted onsite at offices and data centers, and refrigerant fugitive emissions from owned and operated equipment.

³ Indirect GHG emissions resulting from the consumption of purchased electricity or district-chilled water and steam at owned or controlled facilities, including all offices and data centers.
